## CS0701 - Surface Mounted Vent Grille

[CS701]

A surface mounted ventilation grille, primarily used within a designated cell unit. The grille offers a 17.9% free area for ventilation. Perforated to Home Office agreed dimensions to reduce ligature opportunities and restrict passing of contraband.

Complies with the Police Buildings Design Guide and Court Standard and meets the criteria for maintaining the highest level of security within the safe and secure environment of a Police Station, Magistrates or Crown Court, Prisons or HM Armed Forces.

### specification

- Constructed from 4mm thick grade 304 perforated stainless steel sheet welded within a 2mm thick zed section stainless steel frame with the corners of the frame rounded to reduce potential ligature attachment
- The grille is designed for surface mounting directly on top of masonry, render or tiling using tamper resistant screws
- 17.9% free area for ventilation

### finish

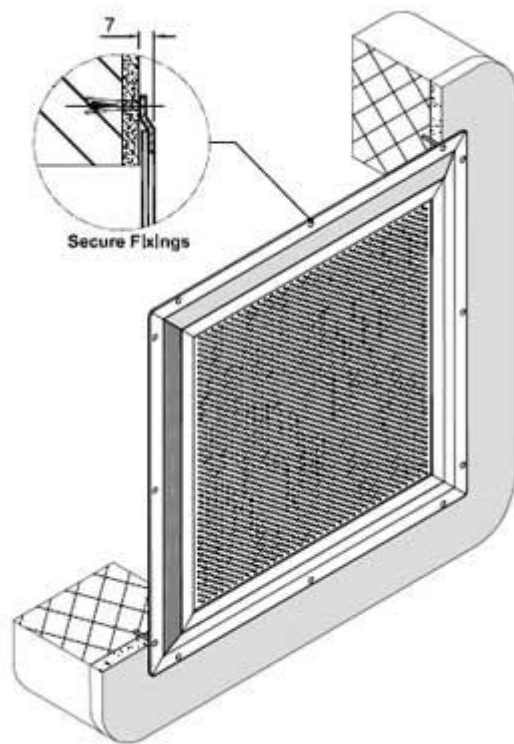

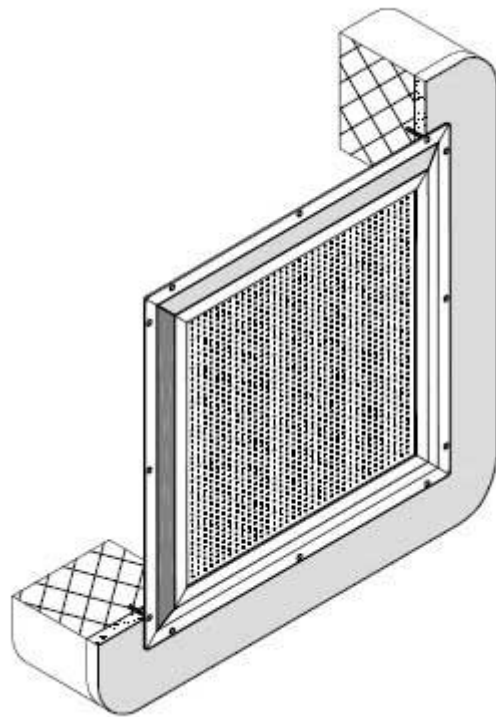

- Satin finish stainless steel, left natural

### options

- Almost any size available
- Can be provided in grade 316 stainless steel

## CS0702 - Flush Mounted Vent Grille

[CS702]

A flush mounted ventilation grille, primarily used within a designated cell unit. The grille offers a 17.9% free area for ventilation. Perforated to Home Office agreed dimensions to reduce ligature opportunities and restrict passing of contraband.

Complies with the Police Buildings Design Guide and Court Standard and meets the criteria for maintaining the highest level of security within the safe and secure environment of a Police Station, Magistrates or Crown Court, Prisons or HM Armed Forces.

### specification

- Constructed from 4mm thick grade 304 perforated stainless steel sheet welded within a 2mm thick zed section stainless steel frame with the corners of the frame rounded to reduce potential ligature attachment
- The grille is designed for flush mounting directly on top of masonry, render or tiling using tamper resistant screws
- 17.9% free area for ventilation

### finish

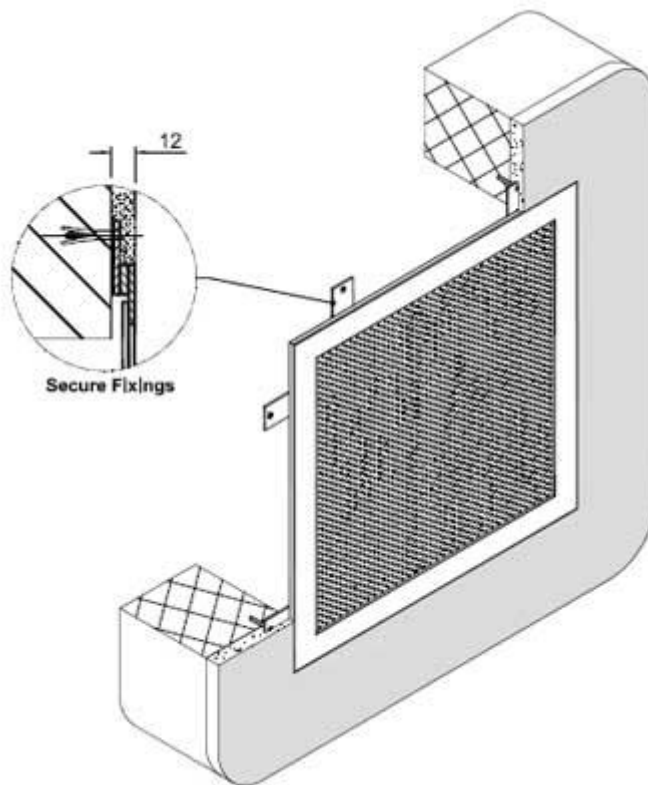

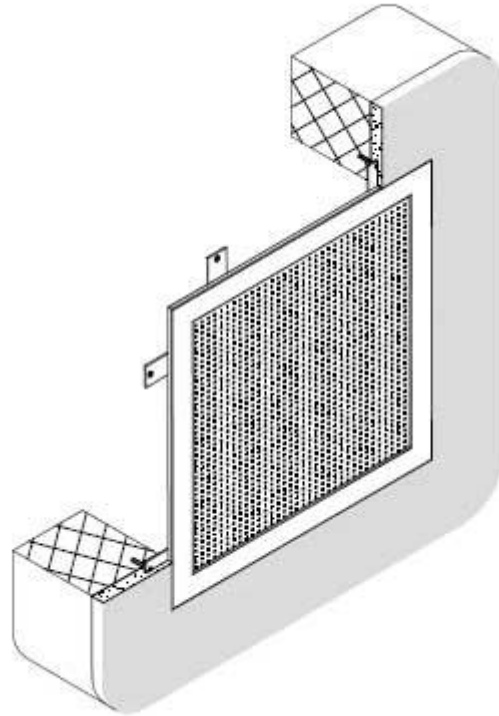

- Satin finish stainless steel, left natural

### options

- Almost any size available
- Can be provided in grade 316 stainless steel

## CS0703 - Cast Iron Air Brick

[CS703]

A cast iron ventilated air brick designed as an alternative to earthenware bricks and used in vulnerable locations, for use in Police Stations, Magistrates or Crown Courts, Prisons or HM Armed Forces.

### specification

- Constructed from cast iron, the unit is designed as an alternative to earthenware air bricks in vulnerable locations, for example at low level in exterior walls to provide ventilation below cell benches or in exercise yards

### finish

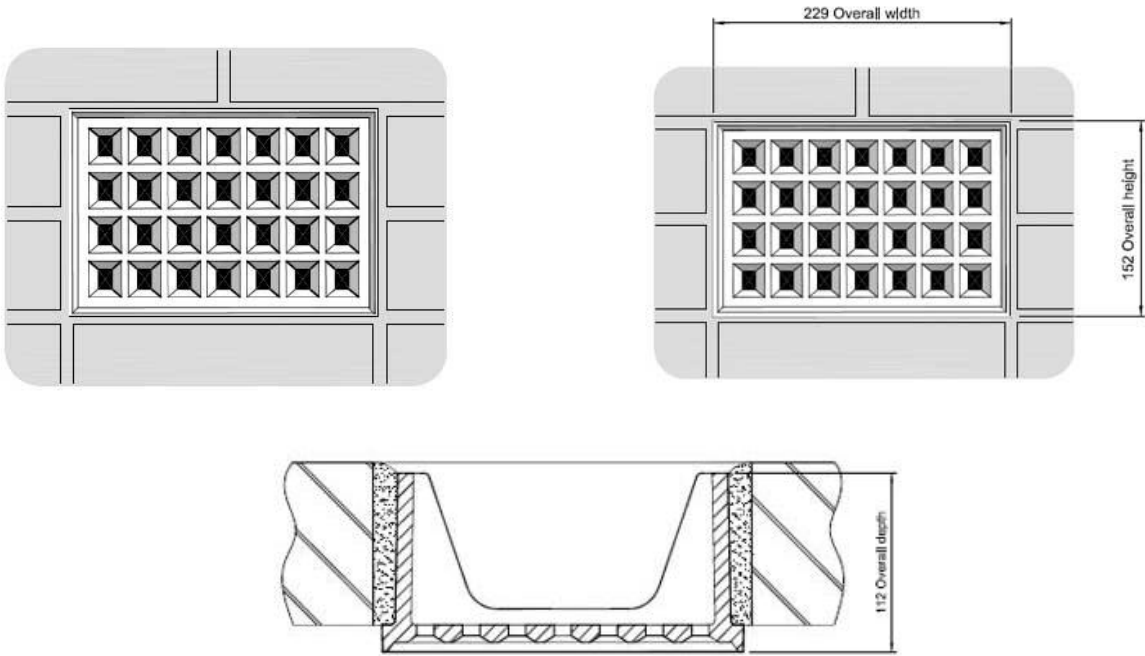

- Satin finish stainless steel, left natural

### options

- Non-available

## CS0704 - Radiator Cover

[CS704]

A ventilated surface mounted steel radiator cover, manufactured and mounted directly over the radiator. Fixed via tamperproof security screws, for use in Police Stations, Magistrates or Crown Courts, Prisons or HM Armed Forces.

### specification

- Constructed from 3mm thick mild steel sheet with perforated areas from 2mm thick grade 304 stainless steel
- Designed to be surface mounted directly on top of masonry, render or tiling
- The 2mm diameter holes in the perforated areas offer 22.7% free area for air transfer, whilst restricting the passage of contraband. All corners are rounded to prevent ligature attachment

### finish

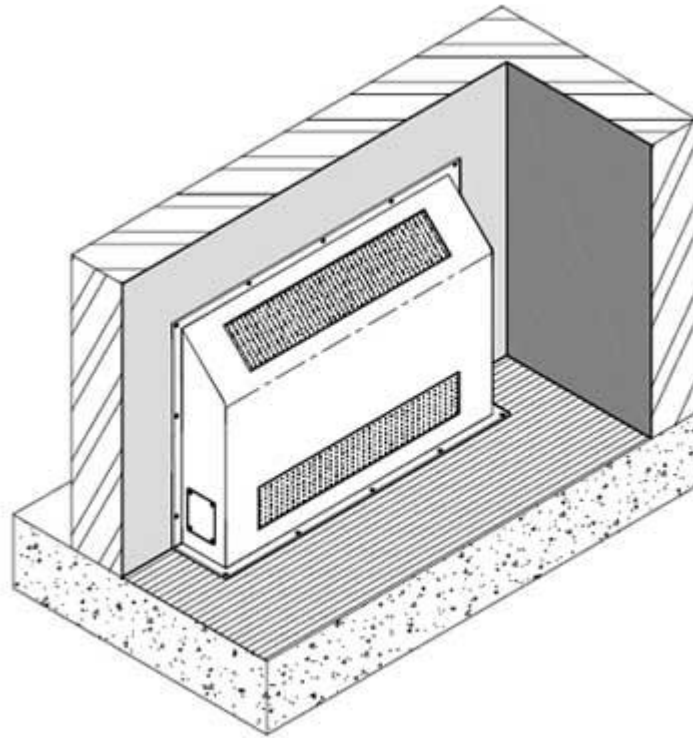

- One coat factory applied primer to mild steel, stainless steel left natural

### options

- Manufactured fully from stainless steel
- Polyester powder coated
- Any size or shape available
- Matching pipe covers as required
